

Cargo

m² Timber System

Multifunctional freight wagon system | February 2022 | © DB Cargo / Michael Neuhäus

Features

- Can be used flexibly for transporting **logs and sawn timber** in all standard lengths
- All **timber bunks** and **support bolsters** featuring integrated grapple protection and lashing system can be positioned variably
- Modular design** enables easy replacement of all individual components
- No restrictions on wagon use in hump yards thus unrestricted use for **single wagonload transport**
- 14 timber bunks** and **13 lashing systems** allow the transport of up to 7 stacks of 3m wood

Designation:	m² Timber System
Loading length (m):	22.64
Loading width (m):	2.63
Stanchion height (m):	1.94
Empty weight (t):	25.8
Max. payload (t):	64.2
Compatible container wagon:	Container wagon 74'
